Prof. Wen-Ya Lee

Department of Chemical Engineering and Biotechnology

National Taipei University of Technology

No. 1, Sec. 3, Zhongxiao E. Rd., Taipei 10608, Taiwan (R.O.C.)

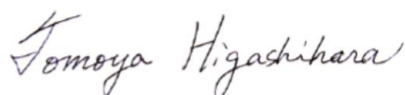

Dear Professor Lee,

I am writing an agreement letter to offer your students to join our group as internship students this summer. They are welcome to work on the synthesis and fabrication of self-healing polymer materials. During the period of internship, they will be allowed access to equipment, labs, the application international student house, and other services. The details of the internship are as follows:

- (1) Job Responsibilities: Students will participate in the collaborative development of self-healing polymer devices.
- (2) Working Hours: The internship will follow a standard workweek, Monday through Friday, with 8 hours per day.
- (3) Compensation: While the internship is unpaid, accommodation will be provided for the students.
- (4) Insurance: Students will be responsible for obtaining their own travel insurance coverage.

I am looking forward to their arrival and believe that their participation here will be another highlight in our future cooperation.

Sincerely yours,

Tomoya Higashihara

Professor

Research Center of Organic Electronics, Yamagata University

4-3-16, Jonan, Yonezawa, 992-8510, Japan
