公司簡介:	<p><b>Background:</b> Yushan Ventures, Inc. is a technology strategy and investment firm operating in U.S.A., Taiwan, Malaysia, Thailand, and Germany and we are a venture partner at a US\$100 million Series A fund in Taiwan. Our investment thesis focuses on deep tech startup companies. We work with Fortune 500 corporations on technology scouting and digital transformation.</p> <p><b>The Position:</b> On behalf of a leading European automaker, the candidate will conduct research on global startups, research institutes, and corporate innovation labs for new technologies and ideas in areas like 4D Printing (additive manufacturing) . The target consists of primary validation of solutions and options for applying 3D / 4D print, its potential as well as its adaption to technical premises and development scopes</p> <ul style="list-style-type: none"> <li>- Global overview of the fields of application for 4D printing technology (4D additive with functional integration).</li> <li>- Potentials of the technology and its solutions and outlook in short-, medium-, and long range - Solutions space and options for the automotive industry (manufacturer besides mobility service provider) including environmental influences</li> <li>- Potential transfers of technological applications from outside the automotive sector / industries</li> <li>- Potential added value and systematic approaches derived from the technology</li> <li>- Impact on current state-of-the-art-development and production topics and activities of Automotive industry, e.g. spare parts</li> <li>- Identification of options for 4D solutions and production feasibility up to 1000 units (small batch series)</li> </ul>		

**Responsibilities:**

- Scout for/ interview startups and R&D projects to identify their USP and product market fit
- Function layout, alternate modular technical concepts and materials
- Elaboration and evaluation of concepts

**Qualifications**

- Engineering or cross-functional product development background preferred
- Previous VC/Startup/Accelerator experience preferred
- Passionate about startups and has a solid understanding of the technology industry
- Able to handle large sets of data records
- Great team player, but also able to work on projects autonomously
- Ambitious, highly motivated, and super keen to learn fast
